Volume 219 October 1990

CONTENTS

Buoyancy-driven instabilities and the nonlinear breakup of a sheared magnetic layer. Fausto Cattaneo, Tzihong Chiueh and David W. Hughes 1

The shape and stability of pinned rotating annular menisci. P. D. Weidman, S. D. Krumdieck and P. Rouse 25

Experiments on ripple instabilities. Part 2. Selective amplification of resonant triads. Marc Perlin, Diane Henderson and Joe Hammack 51

The stress tensor in granular shear flows of uniform, deformable disks at high solids concentrations. Marijan Babić, Hayley H. Shen and Hung Tao Shen 81

On accurately measuring statistics associated with small-scale structure in turbulent boundary layers using hot-wire probes. J. C. Klewicki and R. E. Falco 119

Bubble entrainment by the impact of drops on liquid surfaces. Hasan N. Oğuz and Andrea Prosperetti 143

Breakage models: lognormality and intermittency. Hidekatsu Yamazaki 181

The decay power law in grid-generated turbulence. Mohsen S. Mohamed and John C. LaRue 195

Temperature and velocity field regimes of convective motions in a rotating plane fluid layer. B. M. Boubnov and G. S. Golitsyn 215

Interaction of a deformable bubble with a rigid wall at moderate Reynolds numbers. Peter J. Shopov, Peter D. Minev, Ivan B. Bazhlekov and Zapryan D. Zapryanov 241

Free-surface adjustment and topographic waves in coastal currents. E. R. Johnson and M. K. Davey 273

Hypersonic viscous interaction with strong blowing. A. F. Messiter and M. D. Matarrese 291

Anomalous reflection of a shock wave at a fluid interface. John W. Grove and Ralph Menikoff 313

The long-wave instability in heated or cooled inclined liquid layers. Marc K. Smith 337

The vortices of two-dimensional turbulence. James C. McWilliams 361

The vortices of geostrophic turbulence. James C. McWilliams 387

Motion of a spherical particle in a rarefied gas. Part 2. Drag and thermal polarization. S. A. Beresnev, V. G. Chernyak and G. A. Fomyagin 405

The response of a laminar boundary layer in supersonic flow to small-amplitude progressive waves. P. W. Duck 423

Stability of an oscillated fluid with a uniform density gradient. David Jacqmin 449

Transient features of natural convection in a cavity. John C. Patterson and S. W. Armfield 469

The inviscid instability of a Blasius boundary layer at large values of the Mach number. F. T. Smith and S. N. Brown 499

Second-order wave diffraction by a submerged circular cylinder. M. McIver and P. McIver 519

Molecular mixing via jets in confined volumes. R. E. Breidenthal, V. R. Buonadonna and M. F. Weisbach 531

Laminar flow in twisted pipes. E. R. Tuttle 545

Natural-convection boundary-layer flow over a heated plate with arbitrary inclination. A. Umemura and C. K. Law 571

Spatial evolution of nonlinear acoustic mode instabilities on hypersonic boundary layers. M. E. Goldstein and D. W. Wundrow 585

Waves from an oscillatory disturbance in a stratified shear flow. R. Liu, D. Nicolaou and T. N. Stevenson 609

Experiments on the stability of supersonic laminar boundary layers. A. D. Kosinov, A. A. Maslov and S. G. Shevelkov 621

Capillary–viscous forcing of surface waves. John Miles 635

Shear dispersion along a rotating axle in a closely fitting shaft. Ronald Smith 647

Reviews

Disorder and Mixing, edited by E. Guyon, J.-P. Nadal and Y. Pomeau 659

Shorter notices 660
